Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2022 and, in the light of this review and the current financial position, she is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the municipality for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

I certify that the salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in the note 26 except for irregular expenditure as per note 44 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act..

The annual financial statements set out on page 9 - 85, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2021 and were signed on its behalf by:

M M Skosana

Report of the Chief Financial Officer

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Report of the Chief Financial Officer

1. INTRODUCTION

The financial objective of the district municipality is to secure sound and sustainable management of the financial affairs of the district municipality and to assist the six local municipalities to be financially viable.

Critical functional areas for the district municipality amongst others include improvement of audit outcomes, effective financial management, fully functional internal audit units and audit committees, high vacancy rate in key positions, declining growth in the Regional Services Council Replacement Grant, increase in operational expenditure, which negatively impacts on the allocations to local municipalities.

Issue 3 of the IDP relates to financial viability and includes projects that contributed to the financial viability of the district and local municipalities.

The District was a pilot site from 1 July 2015 for the new mSCOA regulations and successfully implemented the mSCOA for the 2020/21 financial year. 2020/21 are the sixth year of implementation of mSCOA. It has indeed been challenging as the mSCOA chart has been changing with every new version release of the mSCOA by National Treasury. The District has finalised and prepared the annual financial statements for 2020/21 on version 6.4 from 6.3 of mSCOA for the 2019/20 financial year.

Indeed the whole of the financial year brought along very difficult times due to COVID 19 Disaster declaration by the Honourable President of South-Africa. The District had to reprioritise funds through the budget processes to enable the District to respond to the challenges around COVID 19.

2. REVIEW OF OPERATING RESULTS

The 2020/21 budget of the Nkangala District Municipality was approved by Council on the 27 May 2020 under item DM-ND 349/05/2020. The roll over budget was approved 20 August 2020 under DM-ND 56/08/2020. An adjustment budget was approved on the 24 February 2021 under item DM-ND 257/02/2021. Herewith is commentary on the financial results.

2.1 REVENUE

The total revenue of the district increased with 1.07% from R409,710 million (2019/20) to R414,079 million (2020/21) and indicate a positive outcome over the R437,423 million budgeted for the 2020/21 financial year.

Revenue from exchange transactions decreased from R41,116 million (2019/20) to R21,266 million (2020/21), whilst the revenue from non-exchange transactions increased from R368,593 million (2019/20) to R392,812 million (2020/21) of which the major portions is from government grants and subsidies. The district is highly dependent on the RSC Replacement Grant that shows a deterioration growth rate year on year, however indicative allocations published in Division of Revenue Act (DORA) point to a very small increase in the RSC Levy Replacement Grant,

The outlook for the next financial year is that the total revenue will increase compared to the year under review.

TRANSFERS AND SUBSIDIES

Transfers and subsidies increased by 6.94 % from R365,959 million (2019/20) to R391,374 million (2020/21). Transfers and Subsidies include conditional and non-conditional grants, donations or subsidies to the District and amongst others include the RSC Levy Replacement grant, the Equitable Share, Municipal System Improvement Grant, Finance Management Grant and the Expanded Public Works Programme Incentive Grant. All conditional grants have been spent 95.03% and has been recognised as revenue in 2020/21. According to the accounting policies only the portion that has been expensed and meets the conditions of the conditional grant is recognized as revenue.

INTEREST, DIVIDENDS AND RENT ON LAND

The District earned interest, which decreased by 48.96% from R40,431 million (2019/20) to R20,634 million (2020/21). This decrease is attributed to the improved implementation of projects to local municipalities under expenditure: transfers and subsidies paid and left more surplus cash for investment and the increase in interest rates on call deposits. 87.62% realised of budgeted amount for 2020/21 and the variance is due to that more interest revenue was received than anticipated during the budget process.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Report of the Chief Financial Officer

FINES, PENALTIES AND FORFEITS

Revenue from Fines, Penalties and Forfeits decrease by 60.91% from R1,839 million (2019/20) to R0,719 million (2020/21). 189.27% of budgeted amount realised for 2020/21 due to the adhoc nature of the imposing of fines and penalties.

SALE OF GOODS

Sale of goods decreased by 100% from R0,214 million (2019/20) to R0 million (2020/21) and consists mainly the selling of tender documents. 0% realised for 2020/21 due to decreased selling of tender documents as they are also now available free of charge electronically.

OPERATIONAL REVENUE

Operational revenue increased by 38.28% from R0,427 million (2019/20) to R0,591 million (2020/21). 127.09% of budgeted amount realised for 2020/21 due to more operational revenue received than anticipated

RENTAL FROM FIXED ASSETS

Rental from fixed assets decreased by 7.15% from R0,044 million (2019/20) to R0,041 million (2020/21) and flows from the lease agreement with Vodacom. 100% realised as more fixed assets were rented out in 2020/21 than anticipated.

LICENCES AND PERMITS

Revenue from licences and permits has decreased with 9.47% from R0,794 million in the (2019/20) to R0,719 million that was realised in the (2020/21) financial year. 60.41% of budgeted amount realised for 2020/21 due to the new function that are rendered by the District and various according to the number of applications received and the effect of COVID 19 on businesses.

2.2 EXPENDITURE

The total expenditure decreased with 6.66% from R479,134 million (2019/20) to R447,231 million (2020/21) compared to the budgeted operating expenditure of R535,299 million 2020/21. Transfers and subsidies to local municipalities are the main driver of the expenditure of the District

TRANSFERS & SUBSIDIES

This expenditure relates to expenditure on infrastructure and operational projects for local municipalities within the District's jurisdictional area.

Actual grants and subsidies paid for 2020/21 represent 34.28% (41.11% 2019/20) of the total expenditure and decreased by 22.18% from R196,943 million (2019/20) to R153,256 million (2020/21). The actual transfers and subsidies are 67.74% of the budgeted amount of R226,251 million (2020/21) due to the delays in appointments due to COVID 19, projects that are completed from the 2019/20 financial year and transferred from Inventory – Work in progress.

EMPLOYEE RELATED COST

Actual employee related costs increased by 6.68% from R159,124 million (2019/20) to R169,761 million (2020/21) due to the drive to appoint staff in all vacancies and salary increases applied. Actual employee related costs are 98.26 % of the budgeted employee related cost, which is due to the few vacancies which have not been filled in the year under review.

OPERATIONAL COST

The actual expenditure of operational costs decreased by 8.15% from R40,333 million (2019/20) to R37,048 million (2020/21). Actual operational costs are 84.82% of the budgeted operational cost. Due to non-responsive tenders and operational projects that were not fully completed.

CONTRACTED SERVICES

Contracted services increased by 12.70% from R44,190 million (2019/20) to R49,801 million (2020/21). Actual contracted services are 96.76% of the budgeted operational cost, due decrease in allocated contracts for the year.

REMUNERATION OF COUNCILLORS

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Report of the Chief Financial Officer

Payments made to councillors are in terms of the legislation on remuneration of public office bearers.

Actual councillor allowance costs decreased by 0.83 % from R14,798 million (2019/20) to R14,676 million (2020/21). Actual councillor allowance costs are 92.48% of the budgeted remuneration of councillors, due to the % increase that realised on the determination of upper limits.

DEPRECIATION/ AMORTISATION

Depreciation/amortisation is charged on Property, Plant & Equipment/intangibles at rates determined in the accounting policies and asset useful lives are reviewed annually.

Actual depreciation/amortisation costs increased by 2.77% from R15,158 million (2019/20) to R15,577 million (2020/21). Actual depreciation/amortisation costs are 89.50% of the budgeted depreciation/amortisation cost, and is dependent on the acquisition of new assets for the District.

INVENTORY CONSUMED

Actual inventory consumed costs decreased by 25.82% from R6,283 million (2019/20) to R4,661 million (2020/21). Actual inventory consumed costs are 90.89% of the budgeted amount, due to the less than anticipated inventory consumed.

INTEREST, DIVIDEND AND RENT ON LAND PAID

The District only realised interest paid on the annuity loan with DBSA and Financial leases for office equipment.

Actual interest costs decreased by 40.19 % from R0,143 million (2019/20) to R0,085 million (2020/21), the decline is due to the redemption of loans and finance leases. Actual interest costs are 56.93% the budgeted amount due to less finance leases taken than anticipated.

GAINS AND LOSSES

The District only realised a small loss on the disposal of fixed and intangible assets, whilst an actuarial gain was realised for both 2019/20 and 2020/21, which decrease from R2,930 million (2019/20) compared to the loss of R2,021 million (2020/21) financial year. The budget variance is due to the unknown nature of actuarial valuations.

OPERATING LEASES

Actual operating leases costs increased by 9.48 % from R2,162 million (2019/20) to R2,366 million (2020/21). Actual inventory consumed costs are 91.60% of the budgeted amount, due to the two additional leases taken out.

SURPLUS/DEFICIT

The district realised a deficit of R66,494 million 2019/20 compared to the deficit of R35,173 million 2020/21 as a result of the impact of COVID on the expenditure

3. FINANCIAL POSITION

The Statement of Financial position represents the financial strength of the district by a comparison of assets over liabilities.

The total assets of the district decreased by 4.25% from R685,176 million (2019/20) to R656,024 million (2020/21). The contributing factors of this decrease can mainly be attributed to decrease of trade and other receivables and decrease in cash and cash equivalents.

Total liabilities increased by 8.59% from R70,134 million (2019/20) to R76,156 million (2020/21), which is mainly due to the increase in accruals, post-retirement benefits and provisions for long services.

4. KEY RATIOS

CURRENT RATIO

This ratio represents the ability of the district to pay short term obligations within the next 12 months.

Current assets	Current Liabilities	
R million	R million	Ratio

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Report of the Chief Financial Officer

2019/20	486,281	52,846	9.20:1
2020/21	379,075	52,941	7.16:1

ACID TEST

A stringent indicator that determines whether a company/institution has enough short-term assets to cover its immediate liabilities without considering inventory. Institutions with ratios of less than 1 cannot pay their current liabilities and should be looked at with extreme caution.

	Current assets – Inventory	Current Liabilities	
	R million	R million	Ratio
2019/20	431,201	52,846	8.16:1
2020/21	301,898	52,941	5.70:1

SOLVENCY RATIO

This represents the ability of the district to pay both its long term and short term obligations.

	Total Assets	Total Liabilities	
	R million	R million	Ratio
2019/20	685,171	70,134	9.77:1
2020/21	656,006	76,156	8.61:1

OTHER RATIOS

Ratio	30 Jun 2021	30 Jun 2020
Employee related cost and Councillor remuneration / Total expenditure	41.24	36.30
Actual transfers and subsidies paid / Total expenditure	34.27	41.10
Actual transfers and subsidies paid / Total revenue	37.01	48.07

5. CREDIT RATING

The NDM final credit rating report completed by Global Credit Rating Co. in November 2019.

The credit ratings of municipalities are based on South African national scales. The highest grade in the long-term assessment is "zaAAA" and scales down from there to zaBBB – the lowest. Within each of the levels a "+" or "-" sign indicates further relative strength or weakness. An "A" indicates relative strength and capacity to repay liabilities. The best short-term grades range from zaA1+ down to zaA1-. In view of the country's downgraded status the District was also downgraded as expected and overall I am satisfied with the grading given to the district.

NDM CREDIT RATING NOVEMBER 2019

In summary, NDM credit rating analysis is as follows as a per credit rating report issued by Global Credit Rating Co.:

Rating class	Rating scale	Rating	Rating outlook
Long term	National	A(ZA)	Stable
Short term	National	A1(ZA)	Stable
Long term	International	BB-	Stable

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Report of the Chief Financial Officer

NDM CURRENT RATINGS NOVEMBER 2019

Summary rating rationale:

Nkangala District Municipality's ("Nkangala", or, NDM, "the District") ratings are underpinned by its strong financial profile, supported by its net ungeared position and substantial cash holdings. Constraining the ratings somewhat is the District's operating structure, which is over-reliant on grant income funding, with no internally generated revenue ("IGR") to support project implementation.

Nkangala's economy is underpinned by coal mining and primary industries, whose productivity has remained constrained over several years. Consequently, the district's GDP growth has lagged national statistics. The closure of several mines has resulted in an uptick in unemployment in the district to 38%, compared to the 29% national average. Despite some improvement in certain socio-economic indicators, Nkangala has broadly been lagging national metrics over the review period. The District is seeking ways to bolster economic diversification and growth, with agricultural production in particular likely to benefit from mining operations releasing land, but meaningful improvement will only be achieved in the longer term.

GCR considers the district operating structure to be an inherent rating weakness. This is because Nkangala is entirely reliant on grant funding, with negligible internally generated revenue. Conversely, the bulk of its operating costs have been increasing faster than inflation. This has been most evidenced in the rapid progression in staff costs to account for 38.1% of expenditure in FY19, compared to 24.8% in FY15. The escalation in operating costs have seen an inversion in the overall expenditure profile since FY15. Specifically, operating expenditure now accounts for 64% of total annual spend, squeezing out capital implementation, whereas historically capex accounted for approximately 65% of total annual expenditure. As increases to grant income are likely to remain low amidst the weaker national fiscal position, this trend is likely to continue.

Factors that could trigger a rating action:

Positive factors: NDM's ratings are at the upper limit for district municipalities and thus further progression is unlikely unless there is a major change in the operating structure of district municipalities.

Negative factors: A reduction in government support, either through lower grant funding or in terms of perceived operational support would negatively impact the ratings. The ratings could also be downgraded if the current trend of rapid expenditure growth and slow income persists, resulting in an erosion of NDM's liquidity profile.

International scale: The rating is directly linked to the South African sovereign rating, and any movement in the sovereign rating would likely have an impact on NDM's international scale rating.

The District is satisfied with the credit rating under the prevailing circumstances.

No rating was done for 2020 due to cost constraints.

6. GENERALLY RECOGNISED ACCOUNTING PRACTICES

The financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practices (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The following standards were applicable during the year under review:

7. CONCLUSION

Good governance, sound financial management and financial viability remain critical success factors for the district.

8. ACKNOWLEDGEMENT

I would like to extend my appreciation to the Honourable Executive Mayor, Mayoral Committee, Councillors, Audit Committee, Risk Committee and Municipal Public Accounts Committee for strategic direction and leadership demonstrated during the financial year.

The guidance and vision of the Municipal Manager and Heads of Departments are acknowledged with gratitude. A special word of appreciation is extended to all my colleagues for their loyalty and support.

Thank you

AL STANDER

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

Figures in Rand	Note(s)	2021	2020
-----------------	---------	------	------

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Presentation currency

These annual financial statements are presented in South African Rand rounded to the nearest Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Trade receivables / Held to maturity investments and/or loans and receivables

The municipality assesses its trade receivables, held to maturity investments and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables, held to maturity investments and loans and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the [name a key assumption] assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of goodwill and tangible assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. In addition, goodwill is tested on an annual basis for impairment. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including [list entity specific variables, i.e. production estimates, supply demand], together with economic factors such as [list economic factors such as exchange rates inflation interest].

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 17 - Provisions.

Useful lives of property, plant and equipment and other assets

The municipality's management determines the estimated useful lives and related depreciation charges for the waste water and water networks. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Defined Benefit Obligations

The municipality obtains actuarial valuations of its defined benefit plan and other long term employee benefits. The defined benefit plan and other long term employee benefits identified are post retirement health benefit obligations and long service awards. The estimated liabilities are recorded in accordance with GRAP25.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.4 Property, plant and equipment (continued)

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight-line	Indefinite life
Buildings	Straight-line	15 to 30 years
Leased assets	Straight-line	3 years
Machinery and equipment	Straight-line	5 to 20 years
Furniture and office equipment	Straight-line	1 to 15 years
Transport assets	Straight-line	7 to 20 years
Computer equipment	Straight-line	1 to 10 years
Infrastructure: Electricity	Straight-line	20 years
Infrastructure: Roads, Pavements, Bridges and Stormwater	Straight-line	10 to 30 years

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 3 and 4).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 3 and 4).

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.5 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software, other	Straight-line	3- 15 years

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note).

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.5 Intangible assets (continued)

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.6 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.7 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.7 Financial instruments (continued)

Classification

The Municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Investments	Financial asset measured at amortised cost
Bank	Financial asset measured at amortised cost
Cash	Financial asset measured at fair value

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Other payables	Financial liability measured at amortised cost
Long term liabilities	Financial liability measured at amortised cost
Finance lease	Financial liability measured at amortised cost
Other receivables	Financial liability measured at amortised cost

The municipality has the following types of residual interests (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The entity measures a financial asset and financial liability initially at its fair value [if subsequently measured at fair value].

The entity first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the entity analyses a concessionary loan into its component parts and accounts for each component separately. The entity accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.7 Financial instruments (continued)

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, a municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The Municipality assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Derecognition

Financial assets

The municipality derecognises financial assets using trade date accounting.

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.7 Financial instruments (continued)

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

1.8 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the .

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term except where another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis over the lease term except where other systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed

1.9 Inventories

The municipality constructs infrastructure projects, which will subsequently be transferred to local municipalities in its area of jurisdiction at no cost when the project is completed. Projects still in progress and not yet completed are disclosed as inventory. Inventory is measured at the actual costs.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.9 Inventories (continued)

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

1.10 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

Cost plus or cost based contract is a construction contract in which the contractor is reimbursed for allowable or otherwise defined costs and, in the case of a commercially-based contract, an additional percentage of these costs or a fixed fee, if any.

Fixed price contract is a construction contract in which the contractor agrees to a fixed contract price, or a fixed rate per unit of output, which in some cases is subject to cost escalation clauses.

A contractor is a municipality that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of sub-contractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

The municipality assesses the terms and conditions of each contract concluded with customers to establish whether the contract is a construction contract or not. In assessing whether the contract is a construction contract, an entity considers whether it is a contractor.

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by .

Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs incurred are recoverable. Contract costs are recognised as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected deficit is recognised as an expense immediately.

1.11 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Assets that are subject to impairment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recovered.

An impairment loss is recognised if the recoverable amount of an asset is less than its carrying amount. The impairment loss is recognised as an expense in the statement of financial performance immediately. The recoverable amount of the asset is the higher of the asset's fair value less cost to sell and its value in use.

The fair value represents the amount obtained obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties..

The value in use of an asset represents the expected future cash flows, from continuing use and disposal that are discounted to their present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and the risks specified to the asset.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the assets belong. A cash generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash flows from other assets or group of assets. An impairment loss is recognised whenever the recoverable amount of a cash-generating unit is less than its carrying amount.

The impairment loss is allocated to reduce the carrying amount of the asset. The carrying amount of individual assets are not reduced below the higher of the value in use, R1.00 or fair value less cost to sell.

A previously recognised impairment loss related to assets is reserved if there has been a change in the estimates used to determine the recoverable amount, however not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognised in prior periods.

After the recognition of an impairment loss, any depreciation charge for the asset is adjusted for future periods to allocate the assets' revised carrying amount on a systematic basis over its remaining useful life

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.12 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.12 Impairment of non-cash-generating assets (continued)

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.12 Impairment of non-cash-generating assets (continued)

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.13 Net Assets

An equity instrument is any contract that evidences a residual interest in the assets of an municipality after deducting all of its liabilities.

1.14 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.14 Employee benefits (continued)

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measures the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Post-employment benefits: Defined contribution plans

Obligations for contributions to defined contribution plans are recognised as an expense in the statement of financial performance as incurred.

Contributions to the defined contribution pension plan in respect of service in a particular period are included in the employees' total cost of employment and are charged to the statement of financial performance in the year to which they relate as part of cost of employment.

The municipality contributes towards retirement benefits of its employees and councilors to the under-mentioned pension funds:

- Joint Municipal Pension Fund
- Municipal Employees Pension Fund

Municipal Gratuity Fund Councilors are members of the Municipal Councilor's Pension Fund that was established in terms of the Remuneration of Public Office Bearers Act 1998 (Act 20 of 1998).

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.14 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Assets held by a long-term employee benefit fund are assets (other than non-transferable financial instruments issued by the reporting entity) that are held by an entity (a fund) that is legally separate from the reporting entity and exists solely to pay or fund employee benefits and are available to be used only to pay or fund employee benefits, are not available to the reporting entity's own creditors (even in liquidation), and cannot be returned to the reporting entity, unless either:

- the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the reporting entity; or
- the assets are returned to the reporting entity to reimburse it for employee benefits already paid.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.14 Employee benefits (continued)

The entity determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, an entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, an entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is [OR is not] presented as the net of the amount recognised for a reimbursement.

The entity offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.14 Employee benefits (continued)

Long Service Award

The municipality has an obligation to provide long-term service allowance benefits to all of its employees. According to the rules of the long-term service allowance scheme, which the municipality instituted and operates, an employee (who is on the current conditions of service), is entitled to a cash allowance, calculated in terms of the rules of the scheme, after 5, 10, 15, 20, 25 and 30 years of continued service

The municipality's liability is based on an actuarial valuation. The Projected Unit Credit Method is used to value the liabilities.

Actuarial gains and losses on the long-term service awards are recognised in the statement of financial performance.

The amount recognised as a liability for long-term service awards is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality recognises the net total of the following amounts as expense or revenue, except to the extent that another standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which is recognised immediately;
- past service cost, which is recognised immediately; and
- the effect of any curtailments or settlements.

1.15 Provisions and contingencies

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 35.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.15 Provisions and contingencies (continued)

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, an municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

1.16 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

1.17 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.17 Revenue from exchange transactions (continued)

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rental from fixed assets

Rental of facilities arising from the use by others of entity assets yielding interest is recognised when:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.

Interest

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised using in surplus or deficit, using the effective interest rate method.

1.18 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Licences and permits

Revenue from the issuing of licenses and permits in terms of laws and regulations and is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the amount of the revenue can be measured reliably.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.18 Revenue from non-exchange transactions (continued)

Fines, penalties and forfeits

Revenue from the issuing of fines is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

The municipality has two types of fines: spot fines and summonses. There is uncertainty regarding the probability of the flow of economic benefits or service potential in respect of spot fines as these fines are usually not given directly to an offender. Further legal processes have to be undertaken before the spot fine is enforceable. In respect of summonses the public prosecutor can decide whether to waive the fine, reduce it or prosecute for non-payment by the offender. An estimate is made for the revenue amount collected from spot fines and summonses based on past experience of amounts collected. Where a reliable estimate cannot be made of revenue from summonses, the revenue from summonses is recognised when the public prosecutor pays over to the entity the cash actually collected on summonses issued.

Government grants

Government grants are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality,
- the amount of the revenue can be measured reliably, and
- to the extent that there has been compliance with any restrictions associated with the grant.

The municipality assesses the degree of certainty attached to the flow of future economic benefits or service potential on the basis of the available evidence. Certain grants payable by one level of government to another are subject to the availability of funds. Revenue from these grants is only recognised when it is probable that the economic benefits or service potential associated with the transaction will flow to the entity. An announcement at the beginning of a financial year that grants may be available for qualifying entities in accordance with an agreed programme may not be sufficient evidence of the probability of the flow. Revenue is then only recognised once evidence of the probability of the flow becomes available.

Restrictions on government grants may result in such revenue being recognised on a time proportion basis. Where there is no restriction on the period, such revenue is recognised on receipt or when the Act becomes effective, which-ever is earlier.

When government remit grants on a re-imbursement basis, revenue is recognised when the qualifying expense has been incurred and to the extent that any other restrictions have been complied with.

Other grants and donations

Other grants and donations are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the amount of the revenue can be measured reliably; and
- to the extent that there has been compliance with any restrictions associated with the grant.

If goods in-kind are received without conditions attached, revenue is recognised immediately. If conditions are attached, a liability is recognised, which is reduced and revenue recognised as the conditions are satisfied.

1.19 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.20 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.21 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.22 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense and where recovered, it is subsequently accounted for as revenue in statement of financial performance.

1.23 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

Fruitless and wasteful expenditure is accounted for in line with all relating requirements, including, but not limited to, ruling Legislation, Regulations, Frameworks, Circulars, Instruction Notes, Practice Notes, Guidelines etc (as applicable).

1.24 Irregular expenditure

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the PFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial year and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.25 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.25 Segment information (continued)

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.26 Budget information

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 01/07/2020 to 30/06/2021.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.27 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.27 Related parties (continued)

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

1.28 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.29 Value Added Tax

The municipality is registered with the South African Revenue Services as a VAT vendor in accordance with section 15(2) of the Value Added Tax (No. 89 of 1991

The municipality accounts for Value Added Tax on payment basis as per the VAT Act

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 18 on Segment Reporting	01 April 2020	Unlikely there will be a material impact
• GRAP 34 on Separate Financial Statements	01 April 2020	Unlikely there will be a material impact
• GRAP 35 on Consolidated Financial Statements	01 April 2020	Unlikely there will be a material impact
• GRAP 36 on Investments in Associates and Joint Ventures	01 April 2020	Unlikely there will be a material impact
• GRAP 37 on Joint Arrangements	01 April 2020	Unlikely there will be a material impact
• GRAP 38 on Disclosure of Interests in Other Entities	01 April 2020	Unlikely there will be a material impact
• GRAP 110 on Living and Non-living Resources	01 April 2020	Unlikely there will be a material impact
• IGRAP 20 on Adjustments to Revenue (and related amendments to IGRAP 1)	01 April 2020	Unlikely there will be a material impact

15. Finance lease obligation		
Minimum lease payments due		
- within one year	1 049 759	529 690
	1 049 759	529 690
less: future finance charges	(216 422)	(25 058)
Present value of minimum lease payments	833 337	504 632
Non-current liabilities	1 705 963	-
Current liabilities	835 581	504 632
	2 541 544	504 632

It is municipality policy to lease certain office equipment under finance leases.

The average lease term was 30-36 months and the average effective borrowing rate was 10% (2020: 11,84%).

16. Defined benefit obligations

Projected accrued liability

The post-employment medical aid benefits are provided for retired employees and their legitimate spouses and is paid monthly. The entitlement to post-retirement medical benefits is based on employees remaining in service up to retirement age and the completion of a minimum service period. The provision is an estimate of the liability based on historical staff turnover and life expectancy of the relevant people and is discounted by using the inflation rate at the reporting date. The following is a reconciliation of the unfunded accrued liability:

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Notes to the Annual Financial Statements

Figures in Rand	2021	2020
-----------------	------	------

16. Defined benefit obligations (continued)

The amounts recognised in the statement of financial position are as follows:

Carrying value		
Opening Balance	12 789 000	13 393 044
Current service cost	1 107 000	1 308 897
Interest cost	1 378 000	1 277 642
Acturial (gain)/loss	1 358 000	(2 905 029)
Employer benefit payments	(310 000)	(285 554)
	16 322 000	12 789 000
 Non-current liabilities	 (15 969 000)	 (12 479 000)
Current liabilities	(353 000)	(310 000)
	(16 322 000)	(12 789 000)

The method used is called the "projected unit credit method". Under this method the accrued service liabilities are determined by projecting all future payments which will be made by the employer in respect of benefits accrued up to the valuation date. Assumptions are made in respect of, inter alia, medical scheme contribution increases, withdrawals, deaths and ill-health, early and normal retirements. These payments are discounted at the valuation rate of discount to determine the present value of the liabilities at the valuation date.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2021

Notes to the Annual Financial Statements

Figures in Rand

2021

2020

16. Defined benefit obligations (continued)

Key assumptions used

The following key assumptions were used to calculate the unfunded accrued liability and the expense figures for the current financial year:

Discount rates used	10,37 %	10,90 %
Health care cost inflation rate	6,95 %	6,89 %
Net-of -health-care-cost-inflation discount rate	3,20 %	3,75 %
Maximum subsidy inflation rate	4,84 %	4,79 %
Net-of-maximum-subsidy-inflation discount rate	5,28 %	5,83 %

Sensitivity Analysis

The liability at the valuation Date was recalculated to show the effect of :

- (i) A one percentage point increase and decrease in the assumed rate of health care cost inflation;
- (ii) A one percentage point increase and decrease in the discount rate;
- (iii) A one-year age increase and decrease in the assumed rates of post-employment mortality;
- (iv) A one-year decrease in the assumed average retirement age; and
- (v) A decrease of ten percentage points in the assumed proportion of in-service members that remain members at retirement.

The table below summarises the results of the sensitivity on the accrued liability:

Assumption	Change	Eligible Employees	Continuation Member	Total	% Change
Central assumptions	-	11,948	4,374	16,322	-
Health care inflation rate	+1%	12,969	4,644	17,613	8%
-	-1%	10,546	4,045	14,591	-11%
Discount rate	+1%	9,994	4,010	14,004	-14%
-	-1%	14,472	4,804	19,276	18%
Post-employment mortality	+1 yr	11,671	4,237	15,908	-3%
-	-1 yr	12,219	4,511	16,730	2%
Average retirement age	-1 yr	13,166	4,374	17,540	7%
Membership continuation	-10%	10,450	4,374	14,824	-9%

The table below summarises the results of the sensitivity analysis on the current service and interest costs for the year ending June 30, 2021.

Assumption	Change	Current Service cost	Interest Cost	Total	% Change
Central assumptions	-	1 107 000,00	1 378 000,00	2 485 000,00	-

Interest cost	1 675 000	1 954 000
Expected employer benefit payment	(353 000)	(369 000)
	19 027 000	22 138 000

Amounts for the current and previous four years are as follows:

	2021	2020	2019	2018	2017
Defined benefit obligation	16 322 000	12 789 000	13 393 039	18 544 406	18 165 138

Defined contribution plan

It is the policy of the municipality to provide retirement benefits to all its employees [or specify number of employees covered]. A number of defined contribution provident funds, all of which are subject to the Pensions Fund Act exist for this purpose.

The municipality is under no obligation to cover any unfunded benefits.

Included in defined contribution plan information above, is the following plan(s) which is (are) a Multi-Employer Funds and is (are) a Defined Benefit Plans, but due to the fact that sufficient information is not available to enable the municipality to account for the plan(s) as a defined benefit plan(s). The municipality accounted for this (these) plan(s) as a defined contribution plan(s):

17. Long service awards

Non-current liabilities	5 540 000	4 809 000
Current liabilities	636 000	397 000
	6 176 000	5 206 000

Long service awards

Opening balance	5 206 000	4 462 133
Current service costs	946 000	946 300
Interest cost	396 000	361 488
Actuarial (gain)/loss	25 000	(260 950)
Expected employer benefits payment	(397 000)	(302 971)
	6 176 000	5 206 000

Key financial assumptions

The following key financial assumptions were used to calculate the unfunded accrued liability and the expense figures for the current year.

Assumption

Discount rate	9.77%	7.90%
Salary inflation rate	5.98%	3.41%
Net effective discount rate	3.58%	4.34%

Sensitivity Analysis

The liability at the valuation date was recalculated to show the effect of:

- (i) a one percentage point increase and decrease in the assumed general earnings inflation rate;
- (ii) a one percentage point increase and decrease in the discount rate;
- (iii) a two-year increase and decrease in the assumed average retirement age of eligible employees; and
- (iv) a two-fold increase and a 50% decrease in the assumed rates of withdrawal from service.

The table below summarises the results of the sensitivity on the accrued liability:

Assumption	Change	Liability	% Change
Central assumptions	-	6 176 000,00	-
General earnings inflation rate	+1%	6 613 000,00	7%
-	-1%	5 783 000,00	-6%
Discount rate	+1%	5 773 000,00	-7%
-	-1%	6 631 000,00	7%
Average retirement age	+2 yrs	6 626 000,00	7%
-	-2 yrs	5 722 000,00	-7%
Withdrawal rates	x2	4 656 000,00	-25%
-	x0.5	7 259 000,00	18%

The table below summarises the results of the sensitivity analysis on the Current-Service and Interest Costs for the year ending 30 June 2021.

-----------------	------	------

39. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's risk management policies are established and analyse the risk faced by the municipality, to set up limits and controls to monitor risks and adherence to limits. The risk management policy is reviewed annually and a risk assessment is performed annually and monitored regularly to effect changes in the municipality's activities and risk profile.

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2021	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Finance Leases	833 337	1 705 962	-	-
At 30 June 2020	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Finance Leases	424 830	-	-	-

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2021	2020
Trade and other receivables from exchange transactions	58 558	57 937
Investments	63 308 712	59 299 177
Cash and cash equivalents	285 745 987	334 007 627

Market risk

Interest rate risk

Nkangala District Municipality has a long term investment in the form of a promissory note. The municipality's interest rate risk arises from long-term borrowings which are issued at variable rates thereby exposing the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

-----------------	------	------

40. COVID-19

The COVID-19 pandemic has had an impact on the operational and strategic functioning of the municipality. During the year under review the municipality has spent an amount to the tune of R 3 392 678.55 in aid of compliance to the National State of Disaster Regulations. Funds were spent on necessities which include personal protective equipment and sanitizers as a means of protecting municipal employees and the community at large.

The virus has been anticipated to be in existence through the financial year which will result in a significant bearing on the future functioning of the municipality. The pandemic is proposed to have a major impact on the performance and cash flow of the institution due to its decimation of economic activities from a global perspective. We are therefore anticipating reduced revenue collection which will have a significant impact on the financial performance of the municipality. This will also have a negative impact on the cash flow projections of the municipality which will result directly to a diminished liquidity position for the municipality.

COVID-19 EXPENDITURE BREAKDOWN

Salaries- Overtime	2 670 880	875 909
Materials and Supplies	721 798	2 225 438
Transfers and Subsidies	5 278 000	1 411 500
	8 670 678	4 512 847

41. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

42. Events after the reporting date

The council have taken a resolution to establish Nkangala Economic Development Agency which will have an impact on the reporting of the district in the future.

On the 23rd August 2021, the Executive Mayor Cllr. TS Masilela, General Manager Community Development Services Dr. T Matoane-Nkabinde and the Special Programmes Coordinator Ms. T Ndlovu were arrested by the Middelburg Hawks on allegations of their involvement in the procurement made for Ndzundza Mabusa Heritage Day Celebration held on the 28th September 2019. They were arrested together with five (5) service providers of the municipality as well as a Secretary to Ndzundza Mabhoko Traditional Council.

43. Fruitless and wasteful expenditure

Opening balance as previously reported	34 500	34 500

46. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

47. Segment information

General information

Identification of segments

The municipality is organised and reports to management on the basis of six major functional areas: Council, Governance, Finance, Social Services, Planning and Development, Technical Services and Administrative and Corporate Support. The segments were organised around the type of service delivered. Management uses these same segments for determining strategic objectives. Segments were aggregated for reporting purposes.

Information reported about these segments is used by management as a basis for evaluating the segments' performances and for making decisions about the allocation of resources. The disclosure of information about these segments is also considered appropriate for external reporting purposes.

48. Change in estimate

Property, plant and equipment

The useful lives of all asset classes were adjusted during 2020/2021 to more accurately reflect the period of economic benefits or service potential derived from these assets. Refer to note 3. The effect of changing the remaining useful life of assets for the Municipality during 2020/2021 has decreased the depreciation charge for the current by R234 169.42 and future periods. It is impracticable to estimate the effect of these changes on future periods.
